Traditional learning methods, the use of recipes in todays' world has gradually become common place. A recipe is basically a set of instructions that describe how to prepare a particular dish (especially a culinary dish). A standard recipe has to be tested and proven before it is published. A recipe covers everything necessary for cooking a dish. This usually includes the name of the dish, time consumed preparing the dish, a list of required ingredients, required quantities of each ingredient, preparation equipment and environment, as well as a step-by-step of the culinary procedure. And this is usually topped with a photograph of the dish.

City Life from Jakarta to Dakar focuses on the politics incumbent to this process – an "anticipatory politics" – that encompasses a wide range of practices, calculations and economies. As such, the book is not a collection of case studies on a specific theme, not a review of developmental problems, nor does it marshal the focal cities as evidence of particular urban trends. Rather, it examines how possibilities, perhaps inherent in these cities all along, are materialized through the everyday projects of residents situated in the city and the larger world in very different ways.

Renaissance Europe in a moral haze, a young African slave finds herself the unwilling apprentice of an ancient necromancer. Unfortunately, quitting his company proves even more hazardous than remaining his pupil when she is afflicted with a terrible curse. Yet salvation may lie in a mysterious tome her tutor has hidden somewhere on the war-torn continent. She sets out on a seemingly impossible journey to find the book, never suspecting her fate is tied to three strangers: the artist Niklaus Manuel Deutsch, the alchemist Dr. Paracelsus, and a gun-sliding Dutch mercenary. As Manuel paints her macabre story on canvas, plank, and church wall, the young apprentice becomes increasingly aware that

Is there anything new to say about Thomas Jefferson and slavery? The answer is a resounding yes. Master of the Mountain, Henry Wiencek's eloquent, persuasive book—based on new information coming from archaeological work at Monticello and on hitherto overlooked or disregarded evidence in Jefferson's papers—opens up a huge, poorly understood dimension of Jefferson's world. We must, Wiencek suggests, follow the money. So far, historians have offered only easy irony or paradox to explain this extraordinary Founding Father who was an emancipationist in his youth and then recoiled from

But Wiencek's Jefferson is a man of business and public affairs who makes a success of his debt-ridden plantation thanks to what he calls the "silent profits" gained from his slaves—and thanks to a skewed moral universe that he and thousands of others readily inhabited. We see Jefferson taking out a slave-equity line of credit with a Dutch bank to finance the building of Monticello and deftly creating smoke screens when visitors are dismayed by his apparent endorsement of a system they thought he'd vowed to overturn. It is not a pretty story. Slave boys are whipped to make

Parents are divided from children—in his ledgers they are recast as money—while he composes theories that obscure the dynamics of what some of his friends call "a vile commerce." Many people of Jefferson's time saw a catastrophe coming and tried to stop it, but not Jefferson. The pursuit of happiness had been badly distorted, and an oligarchy was getting very rich. Is this the quintessential American story?

crumbling. Destined for Equality, the first integrated analysis of gender inequality's modern decline, tells the story of that progressive movement toward equality over the past two centuries in America, showing that women's status has risen consistently and continuously. Jackson asserts that women's rising status has been due largely to the emergence of modern political and economic organizations, which have transformed institutional priorities concerning gender. Although individual politicians and businessmen generally believed women should remain in their traditional roles, Jackson shows that it was simply not in the interests of modern enterprise and government to foster inequality. The search for

The inherent gender impartiality of organizational interests won out over the prejudiced preferences of the men who ran them. As economic power migrated into large-scale organizations inherently indifferent to gender distinctions, the patriarchal model lost its social and cultural sway, and women's continual efforts to rise in the world became steadily more successful. Total gender equality will eventually prevail; the only questions remaining are what it will look like, and how and when it will arrive.
