Russia's tumultuous early history is unearthed with a view to deciphering the strategies and stratagems that prevailed. Written by best-selling Russian author Vladimir Plougin, a professor at Moscow State University, the stories are drawn from ancient chr

Formerly known by its subtitle "Internationale Zeitschriftenschau für Bibelwissenschaft und Grenzgebiete", the International Review of Biblical Studies has served the scholarly community ever since its inception in the early 1950's. Each annual volume includes approximately 2,000 abstracts and summaries of articles and books that deal with the Bible and related literature, including the Dead Sea Scrolls, Pseudepigrapha, Non-canonical gospels, and ancient Near Eastern writings. The abstracts - which may be in English, German, or French - are arranged thematically under headings such as e.g. "Genesis", "Matthew", "Greek language", "text and textual criticism", "exegetical methods and approaches", "biblical theology", "social and religious institutions", "biblical personalities", "history of Israel and early Judaism", and so on. The articles and books that are abstracted and reviewed are collected annually by an international team of collaborators from over 300 of the most important periodicals and book series in the fields covered.

This is a developmental study of men in mandatory military service based on indepth interviews of young soldiers who had recently completed their service in Israel. The book deals with the central issues of transition to adulthood and the psychological effects of military service in the context of the previous research and theory concerning these subjects.

Because of 9/11, there is universal recognition that aviation security is a deadly serious business. Still, around the world today, the practice of aviation security is rooted in a hodgepodge of governmental rules, industry traditions, and local idiosyncrasies. In fact, nearly seven years after the largest single attack involving the air transport industry, there remains no viable framework in place to lift aviation security practice out of the mishmash that currently exists. It is the ambitious intent of Aviation Security Management to change that. The goals of this set are nothing less than to make flying safer, to make transporting goods by air safer, and to lay the foundation for the professionalization of this most important field. This dynamic set showcases the most current trends, issues, ideas, and practices in aviation security management, especially as the field evolves in the context of globalization and advances in technology. Written by leading academic thinkers, practitioners, and former and current regulators in the field, the three volumes highlight emerging and innovative practices, illustrated with examples from around the world. Volume 1 takes a penetrating look at the overall framework in which aviation security management has taken place in the past and will likely do so in the foreseeable future. It covers the major areas of focus for anyone in the aviation security business, and it provides a basis for educational programs. Volume 2 delves into the emerging issues affecting aviation security managers right now. Volume 3: Perspectives on Aviation Security Management covers the full spectrum of international aviation security-related issues. It will serve as part of the foundation for the next generation of research in the area in both a business and cultural context. Collectively, these volumes represent the state of the art in the field today and constitute an essential resource for anyone practicing, studying, teaching, or researching aviation security management.

The first systematic examination of the federal civil service in nearly forty years. The Foundation of Merit analyzes the historical development of the civil service in the context of the political and democratic environment that is central to its effectiveness and legitimacy. Patricia Ingraham describes theincremental and disjointed growth of the federal civil service and explains how, and why, it came to be a system with control in the wrong places, with discretion in the wrong places, and why--in its current form--it has little hope of meeting the enormous challenges of the next century. The book concludes with an examination of the need for reform, the challenges that have shaped that need, and the lessons from the past that should guide the reforms of the future.

This volume is an engaging and exceptional history of the independent rock 'n' roll record industry from its raw regional beginnings in the 1940s with R & B and hillbilly music through its peak in the 1950s and decline in the 1960s. John Broven combines narrative history with extensive oral history material from numerous recording pioneers including Joe Bihari of Modern Records; Marshall Chess of Chess Records; Jerry Wexler, Ahmet Ertegun, and Miriam Bienstock of Atlantic Records; Sam Phillips of Sun Records; Art Rupe of Specialty Records; and many more.

Neil Smelser skillfully explores committees and looks at topics such as how to get on certain committees and avoid others, how to get the committee work done as efficiently as possible and how to ensure that your views are properly represented in the committee's report.
