2010 years - clinical practice physician assistant...

Seriously unwell children present particular challenges to the medical practitioner. The anatomy and physiology of children is different to that of adults, and this can result in differences in the presentation and severity of a range of conditions (Table 1). Children have a great ability for physiological compensation and some of the early signs of illness may not be obvious.

RACGP - Assessment of the unwell child

In 2005, approximately 400,000 people provided primary medical care in the United States. About 300,000 were physicians, and another 100,000 were nurse practitioners and physician assistants. Yet p...
