~~AUTOMATION IN ROAD RAIL COMBINED TRANSPORT~~

Railway transformation is becoming reality – especially in the area of transport infrastructure. Everything is becoming connected and moving towards automated driving based on traffic demand.

~~Rail automation | Rail | Global~~

Automatic train operation is an operational safety enhancement device used to help automate the operation of trains. The degree of automation is indicated by the Grade of Automation, up to GoA level 4. ATO is primarily used on automated guideway transit and rapid transit systems where it is easier to ensure the safety of humans. On most systems, there is a driver present to mitigate risks associated with failures or emergencies. Many modern systems are
