Advertising Creative, Fifth Edition continues to weave discussions about digital messaging through every chapter. Yet, the underlying theme is still about one thing that never changes--the need for fresh concepts and big ideas in pursuit of the One Thing. This edition introduces a new co-author, Marcel Jennings, who brings a fresh perspective from his background as a copywriter and creative director, as well as teaching at Virginia Commonwealth University. As always, the authors draw upon their experiences as working advertising professionals and teachers to get right to the point, stressing key principles and practical information that students and working professionals can use to communicate more effectively to build memorable brands. They also address some of the key issues impacting our industry today, such as gender equality, diversity in the workplace, and business ethics.

Advertising Theory provides detailed and current explorations of key theories in the advertising discipline. The volume gives a working knowledge of the primary theoretical approaches of advertising, offering a comprehensive synthesis of the vast literature in the area. Editors Shelly Rodgers and Esther Thorson have developed this volume as a forum in which to compare, contrast, and evaluate advertising theories in a comprehensive and structured presentation. With new chapters on forms of advertising, theories, and concepts, and an emphasis on the role of new technology, this new edition is uniquely positioned to provide detailed overviews of advertising theory. Utilizing McGuire's persuasion matrix as the structural model for each chapter, the text offers a wider lens through which to view the phenomenon of advertising as it operates within various environments. Within each area of advertising theory--and across advertising contexts--both traditional and non-traditional approaches are addressed, including electronic word-of-mouth advertising, user-generated advertising, and social media advertising contexts. This new edition includes a balance of theory and practice that will help provide a working knowledge of the primary theoretical approaches and will help readers synthesize the vast literature on advertising with the in-depth understanding of practical case studies and examples within every chapter. It also looks at mobile advertising in a broader context beyond the classroom and explores new areas such as native advertising, political advertising, mobile advertising, and digital video gaming.

Dynamic, rapid, and radical changes are transforming the communication professions, provoking major implications for ethics. Traditional boundaries blur as media converge; relentless competitive pressures cause some forms of communication to atrophy and permit others to explode; and technological advances occur daily. In this volume, a new generation of scholars take a fresh look at the manner in which ethical issues manifest themselves in their areas of research and suggest new agendas for future research. This book addresses a wide range of questions from a variety of communication professions. Contributors tackle such issues as how to define a journalist in an era when anyone can disseminate information to a global audience; how to use "advergaming," crowdsourcing, and facial recognition technology in advertising responsibly; and how to respond ethically in situations of public crisis communication, among many others. This volume will be critical reading for scholars and professionals in media, communication, and digital arts, as well as philosophy, government, public policy, business, and law.
