with an account of the essential features of clinical and laboratory haematology, with selected reading lists and colour diagrams.

The second edition of Essentials of Haematology brings students fully up to date with common haematologic disorders and blood transfusion, with an emphasis on pathogenesis, diagnosis and treatment. Divided into five sections, topics include blood physiology, red and white blood cell disorders, haemostasis disorders and blood transfusion. Each chapter discusses the diagnosis and treatment of a different disorder and the final section describes transfusion
