Book 1, SIMPLE SOLUTIONS for Planet Earth, dealt with energy and the environment. SIMPLE SOLUTIONS for Humanity provides ultimate answers for our society and beyond. Ever wonder if there could ever be a way to end crime and war forever, or the prospects for immortality, or a better educational system, or the reality of extraterrestrial intelligence, or the future of religion? If all the above can be satisfactorily resolved, then, just in case there is no afterlife, where is the best place to live on Earth today? Simple solutions, of course, are hardly that. How to end crime? What about three strikes and you're dead! Sure this should work, but it's not morally rational. The solution to war is

Incredibly simple. Just read the book and find out how. Scientists are getting very close to determining a way to disarm our aging gene. When will this happen? Our educational system is flawed. Be prepared to be shocked by the Stanford Marshmallow Study.

Then find out that our terrible student scores relative to the developed world might not be worth all the anguish. The USA will prevail because of our superiority in.... Could the solution for world peace or curing cancer be streaming in from space? The Search for Extraterrestrial Intelligence could someday soon detect what would be the most monumental discovery since the invention of God. How can religion overcome the immorality of purporting to promise an afterlife WITHOUT ANY PROOF? A Golden Evolution is suggested. Are you one of those who

largely wasted your life looking out only for yourself, family and friends? Could there be a higher calling? You, too, can make a positive difference. Rainbow Vision is explained to equip you with the tools to help save Planet Earth and Humanity.

This is a work of exceptional inspiration by an author who has worked in a variety of occupations for over forty years and has achieved a life far beyond his dreams. While never having had glamorous nor high-paying work, he now has the complete ingredients that make his life full of joy and contentment. James Steamer specifically addresses precisely how most anyone may achieve true life satisfaction and exactly why so many do not. Additionally, he comments on worldly issues with great clarity,

offering practical solutions that work.

He also clarifies key factors in the most philosophical, spiritual, social, and political issues of our time.

If government officials and the ruling elite will not support an economic revival, then we the people must solve the problem—and it starts now. This means putting every working age American back to work and taking steps to help middle class Americans thrive again. While economists throughout the world continue to focus on the causes of our financial shortcomings, author Matt O'Malley has been hard at work coming up with solutions. He proposes that we • pay off our overwhelming debt; • make sure that no child goes hungry; • bring

back the Constitution; and • stop spying on and bullying citizens. He also proposes controversial ideas, such as legalizing the status of undocumented immigrants so we can collect more tax revenue and making some hard decisions as individuals to hold our leaders accountable. It's time to educate yourself and realize just how bad things could get if the ruling elite continue to go unchecked. It all starts with finding Simple Solutions for the Economic Recovery.

The most important interior design book you'll ever read! Feeling uneasy at home? Is your home environment chaotic and dysfunctional? Designing for the King brings insight and answers to questions like these. Deana Murphy

Simple Solutions: For Planet Earth is a scientific book written in a popular style for the average reader. You have read about Peak Oil and Global

Climate Warming, and complained about \$4/gallon gasoline, but how really serious are these headlines and annoyances? The author has worked his entire career on: the science, technology, education, administration and politics of these subjects, and crystallizes this complex field into understandable elements, providing simple solutions for humanity. Does it make sense for the renewable energy budget of the Federal Government to be about \$1 billion/year when:

- o Annual tax incentives and government programs for the oil industry are supposedly in the range between \$38 billion and \$115 billion, although Lester Brown says \$210 billion in 2005.
- o Farm subsidies alone in 2004 cost taxpayers \$16.2 billion.
- o Our country spends \$12 billion a month, or \$144 billion/year, on the Iraq and

Afghanistan wars, ostensibly to protect oil, only to raise prices. The author's long experience with the Greenhouse Effect has led him to believe that methane, not carbon dioxide, could well be the critical gas of concern, for there is potential for global warming to cascade into, what he terms, the Venus Syndrome. The closing chapter speculates on a hypothesis regarding mega-tsunamis (100 meter waves) from landslides. While simple solutions are suggested, the problem is the inability of our civilization to agree on a workable strategy, which is further weakened by the lack of will on part of the general populace. Thus, the reader is urged to help make that crucial difference. Instructions and examples are provided on how to attain Rainbow Vision to carry out this mission for a better Planet Earth.
