The Future of Protein research project aims to delve into this complex societal challenge through an objective multi-dimensional take, aiming to build dialogue across the interconnected themes which are brought together in a holistic discussion about protein. The objective is to work towards a more comprehensive and nuanced set of answers to the difficult questions above, to help guide policy, conscientious consumers, and future research initiatives.

The Future of Protein

The future of protein. The meat-free movement has changed the protein market for good. Dr Wayne Martindale, Associate Professor, Food Insights and Sustainability at the University of Lincoln, tells all. The meat-free market has changed everything we thought we knew about consumer habits, it has also heralded a new view of what food sustainability and integrity means for food manufacturers.

The future of protein - New Food Magazine

The future of proteins according to Stacy Pyett Published on October 30, 2020. The second edition of the ReThink Protein Challenge is just around the corner. On 5 November, students can join an online information session to learn everything they'd like to know about this Challenge.

The future of proteins according to Stacy Pyett - WUR

The future of protein: trends, challenges and opportunities in the global protein industry. report 14 March 2019. Download Full Report. Demand for protein is undergoing a period of unprecedented growth presenting opportunities for efficiencies, diversification & innovation. Read our industry analysis. This growth is driven by a number of factors, including:

The Future of Protein: Trends, Challenges & Opportunities ...

A couple of years ago, I presented at the University of Ottawa's "The Future of Protein" event. When many people talk about the future of our food system, they're looking at how to produce calories. I loved this event because it was all about protein, not just calories. We don't have an issue producing calories.

What is the Future of Protein? - Sacred Cow

The Future of Protein & the Protein of the Future in Europe Based on an increasing global demand for protein and that the resulting pressure on traditional animal sources is nowadays considered unsustainable, there is an urgent need of new sustainable protein alternatives with a high nutritional quality, safe and with technological functionalities that satisfy the consumer needs and expectations.

The Future of Protein & the Protein of the Future in ...

the future of proteins Henning Hartnacke is President of the Flavour Division for Givaudan in Europe, Africa and the Middle East (EAME). What is the Future of Protein? Enter Regenerative Agriculture. Food that is grown in a regenerative way is really our only hope for our future. This... Let me take a step back.... Life on earth is complex. To help illustrate this point, let's look at establishing life on... Let's start over again. ...

What is the Future of Protein? - Sustainable Dish

Increased demand for feed and food proteins Demand for "locally" produced protein sources for feed, In particular for market segments demanding non-GM and/or organic feed (dairy and aquaculture are first movers). Meat consumption is decreasing in some countries and demand for new plant based proteins is increasing.

Proteins for the Future - European Commission

The broad-level qualitative assessments of alternative protein sources were based on a combination of the current-day realities and the future potential (10-20 years) of each protein source. Positive (+) represents a protein source with high potential to meet demand, while negative (?) represents a protein source that has obstacles that will need to be overcome before development.

The Future of Aquatic Protein: Implications for Protein ...

The Future of Protein: Shaping the future of food. Our solution. We envisage a future in which everyone in our growing global population has access to healthy, sustainable and affordable sources of protein. Every player in the protein system has a role in driving change. Together, we can build a sustainable protein system by:

Protein Challenge 2040 | Forum for the Future

Animal-based proteins, especially those from large land mammals—like cows—is a climatological nightmare. A 2015 study by the Johns Hopkins Center for a Livable Future found that if current meat and dairy consumption levels continue, we'd likely exceed by 2050 the catastrophic 2-degree-Celsius global temperature rise that climate scientists have warned about.

Protein of the future | Hub

According to Jaxa, the protein that slowed down part of the transformation is Nrf2, in a finding that could benefit astronauts during future manned space missions as it will help in the ...

Scientists discover protein that could combat ageing ...

Cell-based cultured protein is an industry still in its infancy. Food makers should look at the emerging field as an opportunity to collaborate and invest in the sector's development, according to experts speaking at IFF's Plantful Virtual Festival.

The future of cell-based protein: 'Food manufacturers ...

The protein challenge. Protein is an essential part of a healthy diet. However, the current production of protein is creating alarming environmental, food security and economic challenges. To keep up with the increasing demand, systemic change is needed. That's why we help protein companies to equip for the future.

Future of Protein | Deloitte Switzerland

The Future of Protein. Volume 4 | Issue 2 | Page 30-34 | March 2013. By Dawn Starin. Dawn Starin. A street vendor in Bangkok sells a variety of insects—valuable sources of protein that are quite sustainable. In 2010 David Letterman asked Hollywood actress Salma Hayek if she routinely eats bugs. "Look," she responded.

The Future of Protein - The Solutions Journal

Alt protein is tapping into this idea of eco-indulgence: if there's some ecological benefit or some sustainability benefit, people will go ahead and indulge more happily. Liane Ong: In my mind, there are bigger shocks beyond alternative protein that could happen to the protein industry that folks

should be paying attention to.
