1. compact, 2. connected. (4 credits) Answer: A topological space is said to be 1. compact if every open cover possesses a finite subcover, and 2. connected if it admits no nontrivial partition into open sets. Question 6: Give the definition of the diameter of a subset of a metric space. (2 credits) Answer: The diameter of a subset A of a metric space $(X;d)$ is $\sup\{d(x;y) \mid x;y \in A\}$.

Final Test in MAT 410: Introduction to Topology Answers to ...

1 A topology that is responsible for describing the geometric arrangement of components that make up the LAN.

Network Topology Multiple Choice Questions and Answers ...

This set of Data communication and Networking Multiple Choice Questions and Answers (MCQs) focuses on " Network Topology ". 1. _____ refers to the way a network is laid out, either physically or logically

Topology I Final Exam December 21, 2016 Name: There are ten questions, each worth ten points, so you should pace yourself at around 10-12 minutes per question, since they vary in difficulty and you will want to check your work. Use the back of the previous page for scratchwork. By default, I won't grade the scratchwork,

Topology I Final Exam

Answer A network type in which every computer and network device is connected to a single cable. A local area network which consists of a number of nodes connected to a closed loop Use a combination of any two or more topologies in such a way that the resulting network does not exhibit one of the standard topologies (e.g., bus, star, ring, etc.).

Network Topology Quiz | Quiz

Star Topology. Ring Topology. Wired Mesh. A bus topology uses a trunk or backbone to connect all the computers and other network devices. The ring topology is a logical ring, meaning that the data travels in a single direction. The wired mesh topology incorporates a unique network design. Bus Topology.

network topology Flashcards and Study Sets | Quizlet

Topology of Metric Spaces A function $d: X \times X \rightarrow \mathbb{R}^+$ is a metric if for any $x;y;z \in X$; (1) $d(x;y) = 0 \iff x = y$. (2) $d(x;y) = d(y;x)$. (3) $d(x;y) \leq d(x;z) + d(z;y)$: We refer to $(X;d)$ as a metric space. Exercise 1.1 : Give five of your favourite metrics on \mathbb{R}^2 : Exercise 1.2 : Show that $C[0;1]$ is a metric space with metric d .

TOPOLOGY: NOTES AND PROBLEMS

Topology is the branch of mathematics that deals with surfaces and more general spaces and their properties, such as compactness or connectedness, that are preserved by continuous functions. Concepts such as neighborhood, compactness, connectedness, and continuity all involve some notion of closeness of points to sets.

Answer: (d). stub 10. In a star-topology Ethernet LAN, _____ is just a point where the signals coming from different stations collide; it is the collision point.

Networking Multiple choice Questions and Answers-LAN ...

that topology does indeed have relevance to all these areas, and more.) Topological notions like compactness, connectedness and denseness are as basic to mathematicians of today as sets and functions were to those of last century. Topology has several different branches | general topology (also known as point-

TOPOLOGY WITHOUT TEARS1 - BIU

In mathematics, topology (from the Greek words _____, 'place, location', and _____, 'study') is concerned with the properties of a geometric object that are preserved under continuous deformations, such as stretching, twisting, crumpling and bending, but not tearing or gluing. A topological space is a set endowed with a structure, called a topology, which allows defining continuous deformation of subspaces, and, more generally, all kinds of continuity. Euclidean spaces, and, more ...

Topology: Short Questions and MCQs We are going to add short questions and MCQs for Topology. This is a compulsory subject in MSc and BS Mathematics in most of the universities of Pakistan. The author of this page is Dr. Atiq ur Rehman, PhD.

Topology: Short Questions and MCQs - MathCity.org

A topological space is a pair (X, τ) where X is a set and τ is a set of subsets of X satisfying certain axioms. τ is called a topology. Since this is not particularly enlightening, we must clarify what a topology is. Definition 1.4.2. A topology τ on a set X consists of subsets of X satisfying the following properties: 1.
